VERION AI FORENSIC INCIDENT DISCLOSURE

INCIDENT ID:	IR-2026-0914-ALPHA
SEVERITY:	HIGH // SUSPECTED CREDENTIAL COMPROMISE
SECURITY CLASSIFICATION:	LEVEL 1 - UNCLASSIFIED // PUBLIC RELEASE
REPORTING DATE:	2026-10-08 12:00:00 UTC
ORIGINATING UNIT:	Security Operations Command (SOC)

1. EXECUTIVE SUMMARY

2. CHRONOLOGICAL SCOPE & TARGET ASSETS

The incident window is constrained between 20:30 UTC and 22:00 UTC on October 7. According to shift logs, routine proxy server maintenance was scheduled for completion at 20:30 UTC. However, suspicious high-volume outbound network egress was detected between 21:15 UTC and 21:25 UTC. Immediate containment actions were executed at 22:30 UTC to revoke the affected cryptographic keys and isolate the relevant subnet.

3. AUDIT DIRECTIVE

Investigators must cross-reconcile verbal witness testimony against immutable firewall and SSH bastion audit streams. Any discrepancy between human claims and cryptographic machine records must be surfaced as an investigative priority.
